2. Introduction

Text files comparator – single purpose program which will be useful in terms of comparing two text files and finding differences between them. It will allow user to choose between both version of document making merge of those two files. Additional feature will be possibility of editing chosen version of document. This document shows two interaction diagrams for the program. One of them is for the full flow of the program and presents its actions from start to finish. The other diagram is focused on resolving conflicts and covers the process of making decisions based on user's input.

3. Sequence diagram of the program

4. Sequence diagram of resolving conflicts
